

3D Secure MPI Solution

PayDollar 3D Secure MPI (Merchant Plug-in) is a certified, flexible, integrated, and robust payment authentication solution product for acquiring banks and merchants. It allows three processes to work seamlessly:

1. Cardholders enjoy peace of mind during online shopping that their cards will not be used without authorization,
2. Merchants are protected from fraud with payer authentication, and
3. Banks are assured that the transaction is legitimate.

Features

❖ Certified

Complies with;

- Verified by Visa 3-D Secure Protocol version 1.0.2
- MasterCard SecureCode
- JCB J/Secure
- American Express SafeKey

❖ Flexible Setup

License installed at the bank, PSP or merchant's server or through a hosted, licensed PSP gateway

❖ Flexible IP Address Change

No need to apply for a new license in case of IP address relocation

❖ Integrated Report

Covers Verified by VISA, MasterCard SecureCode, JCB J/Secure, and American Express SafeKey

❖ Built-in License Control Manager

Allows banks and PSPs to administrate license issue and IP changes in Java or Web interfaces

Benefits

❖ Cost Savings

Protects merchants from chargeback losses and costs related to fraudulent or disputed online transactions

❖ Comprehensive and Integrated

Single license covers 4 major international credit cards save considerable setup and maintenance overheads for merchants and banks

❖ Ease-of-deployment

with flexible license offering for different deployment approaches; choice of standalone or hosted license

❖ Flexible Product Offering

provides much wider merchant needs

- Support change of IP over server / hosting migration
- Support merchant without dedicated server

❖ Quality Service Support

Round the clock professional local support in most Asian countries
